Fuel consumption and CO₂ data applies to the German Market. The specified values are determined in accordance with certain test procedures. The specifications do not refer to an individual vehicle but serve only as a basis for comparing the different types of vehicles. In addition, the consumption figures achieved during normal driving may differ from the test values, depending in particular on special equipment fitted, vehicle loading, personal driving style, road and traffic conditions, environmental factors and conditions of the car. Pricing and specification is valid for vehicles produced from model year 2025 onwards.

* RRP is inclusive of VAT, CO₂ emissions tax and an optional 5 year/100,000km Audi Freeway Plan

ON5	<p>All-wheel steering Improves the driving dynamics and the driving comfort as a result of additional steering ability of the rear axle. At lower speeds, the rear axle self-steers oppositely to the steering angle of the front axle. This results in higher agility & reduces turning circle from approx. 12.4m to 11.4m., making manoeuvring easier, especially in tight bends and when parking. At higher speeds, steering in the same direction improves the responsiveness as well as the driving dynamics, cornering and vehicle stability.</p>	R 26,800	R 26,800	S	S

PXB	<p>HD matrix LED headlights with Audi laser light, LED rear lights and headlight cleaning system The innovative, multi-row HD matrix LED headlights provide more precise illumination of the road thanks to their higher resolution. Dazzling for oncoming vehicles or vehicles in front can be considerably reduced. The Audi laser light supplements the LED main beam at high speeds. Providing almost double the range of the main beam, the LED headlights illuminate a wide area in front of the vehicle. Within system limits and depending on speed, the Audi laser light is activated automatically and only outside of built-up areas. This innovative technology is made visible by the blue LED lighting in the headlight. To customise the vehicle, there are various daytime running light signatures in the MMI touch response display that can be changed conveniently at any time.</p>	R 19,500	R 19,500	S	S

8SC	Digital OLED rear lights The digital OLED technology used for the rear lights creates a fascinating and impressive lighting design. They contain wafer-thin lighting elements, which are subdivided several times into individually controllable segments, making it possible to create different and fascinating designs for the digital rear light signature. To customise the vehicle, there are various taillight signatures in the MMI touch display. In conjunction with the assist systems, the digital OLED rear lights have proximity detection. When the vehicle is stationary and other road users approaching from behind come within two metres, all OLED segments are automatically activated.	R 23,000	R 23,000	R 23,000	R 23,000

Welcome to Audi

Audi Freeway Plan | Motoring Peace of Mind

There can be no better motoring peace of mind than knowing that your car will be serviced, maintained and repaired, should this prove necessary, at no cost to you. Thanks to Audi Freeway Plan, that peace of mind could be yours.

The Audi Freeway Plan absorbs all maintenance and service costs, with the exception of between-service top-up fluids, fuel, cracked or broken glass, and tyres.

Recommended retail pricing is inclusive of an optional 5 year/100,000 km Audi Freeway Plan on all new Audi vehicles.

Top-up options to extend maintenance are available at extremely competitive rates. Audi has specially designed the Audi Freeway Plan for easy operation on the part of the owner. Making an appointment with any one of our approved Audi Servicing Dealers can effect regular servicing and maintenance as well as repairs (with the exception of accident damage).

All work is handled by the relevant service department, which will liaise directly with the Audi Freeway Plan Maintenance Unit. No extra effort or payment is required from the Audi owner. The Audi Freeway Plan is registered with the vehicle and as such is transferable to the new owner should the car be sold before the Audi Freeway Plan has expired, giving added resale value. The Audi Freeway Plan is available in addition to Audi's standard one-year/unlimited distance vehicle warranty. The Audi Freeway Plan is subject to certain exclusions, covers any repairs necessary after the expiry of the standard warranty.

Audi Assist | Emergency and Personal Assistance

Audi Assist is a programme whereby Audi of South Africa and its Dealer Network pledge to provide you with peace of mind motoring by providing the infrastructure to support a countrywide emergency service 24 hours a day, every day.

The programme is known as Audi Assist and operates within the borders of South Africa as well as Namibia and Botswana. The objective of the programme is to ensure on the spot roadside assistance offered by a fully equipped and trained Audi technician.

The primary focus is to get you mobile in your own vehicle. Where a roadside repair cannot be effected and the vehicle needs to be towed to the nearest Audi dealer, you and the occupants of the vehicle will be transported to a place of safety in the dealer's roadside assistance vehicle.
